

OCTOBER ENRICHMENT NEWS

HUDSON'S HEADLINES

I cannot believe October is upon us! Your children have already learned so much! They are developing a deeper understanding of historical connections, literary elements, written expression, plot and character development and figurative language with our Shakespeare Unit. I hope that as they continue to learn to express themselves in creative ways, that they come to deeper understanding of the 5th grade gifted theme of interdependence.

Mrs. Hudson:

Shakespeare's Life
Shakespeare's Plays
The Globe Theatre

Advanced Math

Hands On Equations
Math Logic

Development of Self

Powerful Poetry

WHAT GIFTED LEARNERS NEED

Gifted individuals need learning experiences that are rich and relevant to their lives, activities that allow them to process important ideas at high levels, opportunities to grapple with meaningful problems, and projects that embed critical thinking and creative problem solving. To thrive, gifted students must be allowed creative expression of their ideas and given the flexibility to learn in innovative ways. If your child is interested in technology, there is a county competition coming up that might be just the thing for your child to showcase a creative digital talent. Please see the flyer on the next page for more details.
